

Please avoid vehicle idling when parked* - for our health, our planet...and your wallet!

THE PRICE OF IDLING WHEN PARKED:

money
out the
tailpipe, polluting
the air we breathe,
CO₂ emitted,
energy wasted.

AVOID DRIVE-THRUS:

park the vehicle, shut it off, and
walk into the place of business.

Full hybrids, plug-in hybrids, all-electrics excepted.

MANY STATES restrict
idling of heavy-duty vehicles.

Also, if leaving a vehicle
unattended on a highway,
it must be shut off.

Protect
child and
adult health
by shutting
off engines at
schools.

VEHICLE EXHAUST

is a known
asthma trigger.

JUST 10 SECONDS OF IDLING

wastes more fuel
than shutting
off and
restarting the engine.

UPS PRACTICES NO-IDLING, saving

\$\$\$ by shutting off and re-
starting engines all day long. If
they can do it, so can you!

15 MINUTES OF PARKED IDLING daily

at \$3.75 a gallon can cost
\$75 to more than \$235
annually, depending
on engine size!

WARM- UPS ARE UNNEEDED

unless below
freezing; driving gently
is the best way to warm
up.

NOTE: 30 seconds suffices
down to 10 degrees - check
windshield defrosting.

GREEN DRIVING AMERICA

For more facts on
vehicle idling, visit
<http://greendrivingamerica.org/idling.html>

*includes delays at railroad crossings, construction zones and border crossings; not advisable to turn engines off at traffic lights
